

Salary Survey Summary

A salary survey was conducted during the 2008-2009 year to determine the salary ranges for RPAs. The survey was divided into the ten federally recognized regions of the country and territories and is based on population. There were 292 responses out of a total of 371 total certified during the survey time period giving a return of 79%. Twenty-four (24) or 6% of the responses stated they were not working as an RPA due to multiple reasons; therefore the survey figures are based upon 268 responses or 72% of the total certified RPAs.

If salary information is needed for a specific region, contact the CBRPA office to obtain a copy.
